company estate dream

SWIMCAMP
company estate dream

An architectural sketch of a modern building's exterior. The scene features a wide, light-colored walkway that curves around a central area. In the background, there are several rectangular structures, some with horizontal lines, suggesting a multi-story building. A person's silhouette is shown walking away from the viewer on the right side of the walkway. The overall style is minimalist and uses clean lines and a limited color palette.

SWIMCAMP
overcoming new HORIZONTS

by jordi closa guerrero & Sumun

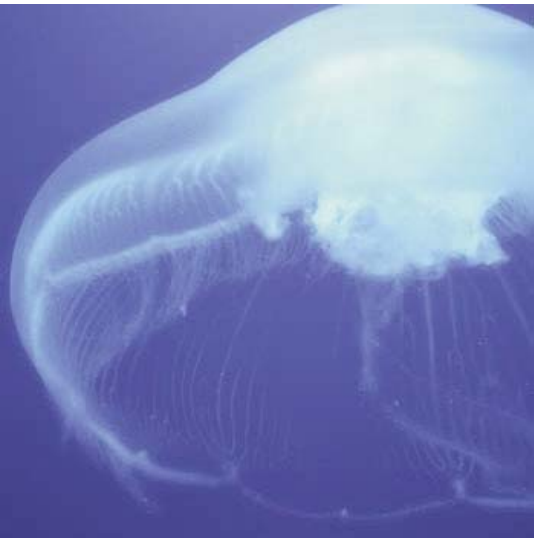

THE CONCEPT

Inspiration is out there...

...let nature show us:

water-lilies, taking the rain-water with their petals while floating on the still water

jellyfishes impelling themselves to swim by taking and releasing water with their bodies

THE AESTHETICS

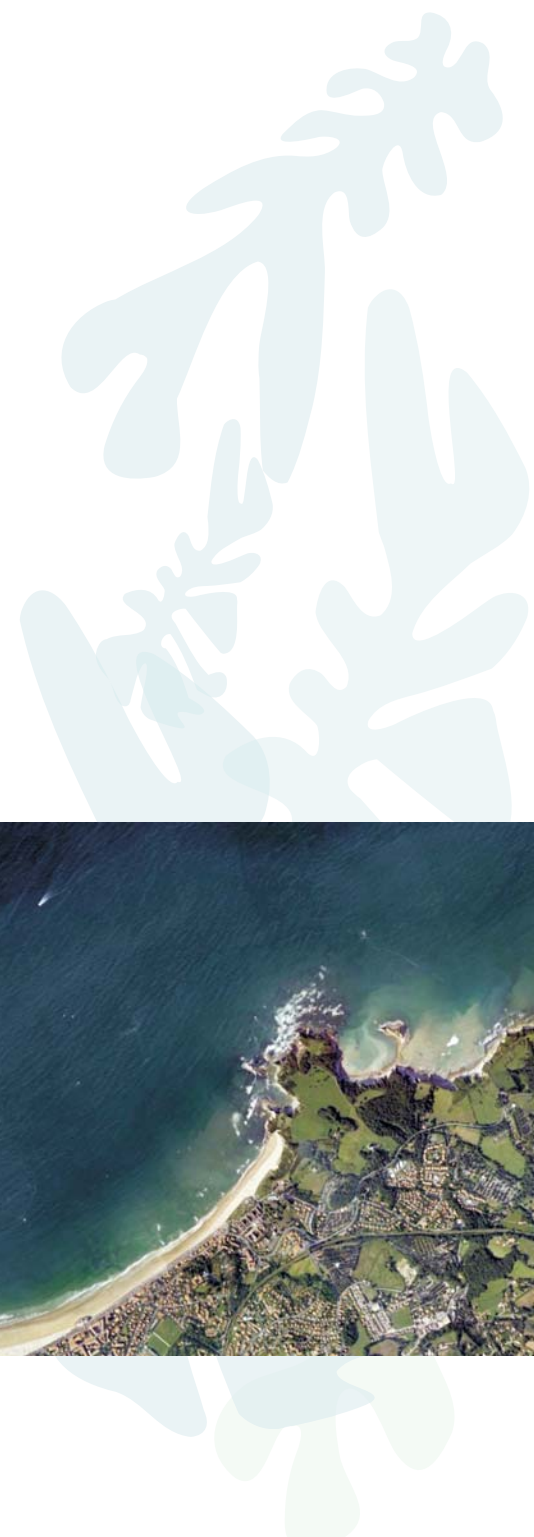

Looking at French art we find **Henry Matisse**, one of the best-known artists of the 20th century known for his use of colour and his fluid, brilliant and original draughtsmanship.

His work is a big support in finding the right color and graphic concept for the interior design of the building.

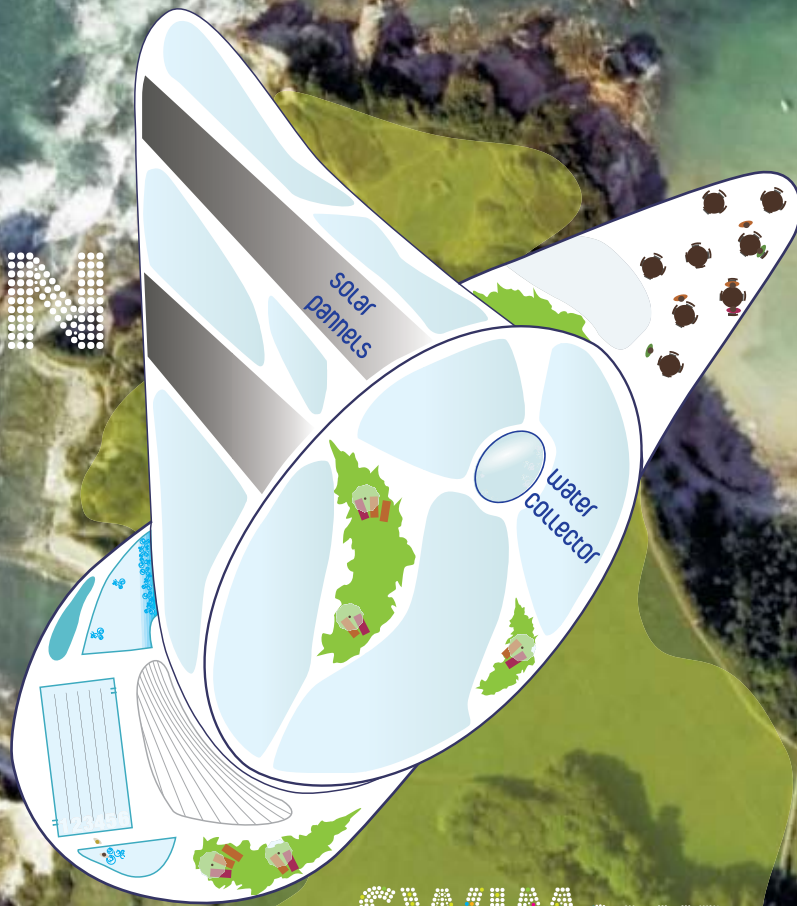

THE LOCATION

Hendaie the most southwesterly town in France, on the right bank of the Bidassoa that marks the border with Spain. Elevated over the sea, having the possibility to enjoy the coast and water view from every position
